DETAILED ACTION

Election/Restrictions

1. A telephone call was made to Craig Slavin on April 22, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30, drawn to the apparatus of a probe, classified in class 604, subclass 22.
 - II. Claims 31-36, drawn to a method of forming a lesion in tissue, classified in class 604, subclass 514.
3. Groups I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be used with another type of incision device such as a knife or laser instead of a loop to form a lesion if a portion of tissue.
4. Should applicant elect Group I, he/she is further required to elect between combination/subcombination as detailed below.
 - III. Claims 11-20 and 21-30 drawn to combination of a probe, classified in class 604, subclass 96.01.
 - IV. Claims 1-10 drawn to subcombination of a probe with a control element, classified in class 604, subclass 890.01

Art Unit: 3743

5. Groups III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed can operate as a probe without the added control element of the subcombination. The subcombination has separate utility such as being able to direct and control the guidewire loop.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabrina Dagostino whose telephone number is 703-306-3485. The examiner can normally be reached on M-F 7-3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 703-308-0101. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9302 for regular communications and 703-872-9303 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0861.
